Michel Mine Explosion Takes Men's Lives

Macleod Stampede Reminiscent of Early Days of Western Canada and Wide, Open Spaces

Thrilling Program Showed Adventurous Spirit of Old Ranch Days Still Lives in Daring Riders and "Cow-Punchers."

Macleod on July 1st and 2nd had a real western atmosphere, reminiscent of days when the west was young, when horseflesh and steers instead of automobiles were the average westerners prime consideration. Added to the gathering of white people, all in cheerful mood over the fine prospects as a result of copious June rains to moisten the land after years of dryness, were most of the Indians and their families from the Peigan and Blood reserves.

Riding of bucking horses, roping of calves and bareback riding of long-horned steers kept the big crowd on their toes during the afternoon, and among the contestants was Herman Linder, star performer in rodeos in Canada and the States. Instead of riding to town on a high-stepping cayuse, he came in an airplane.

The contests were fully up to the standard seen in Calgary's famous stampede, and the record time of roping a calf was 22 seconds flat. Some had rough spills, one rider being completely knocked out. The young boys from Cowley were in the riding and bucking contests, and one amusing incident which caused roars of laughter was when the announcer

stated that "Mike Yagos" will come out of Chute 6 on Furious Pete." All eyes were focussed on Chute 6, expecting to see a fury of flying hoofs, mane, tail and human legs, but Furious Pete with his rider just cut a couple of strides out of the chute, and there he stood. Just where that "hoss" earned the name was anybody's guess. The rider was given another steer with more fire and pep, and made a good ride.

About 6:30 a violent rainstorm gave warning of its approach, which made the more than 2,000 people present scatter for cover, but many stayed till late in the night, and parking space on Macleod's streets was fully occupied.

The committee is to be congratulated on the spirited style in which the program was carried through. Macleod was its real old time western "cow-town."

Result Of Ballot For Doctors' Contract

H. G. Claxton	397
C. Rose	
M. C. Burke	
E. L. Leismer	314
G. Maynes	
F. W. Jones	55
Spoiled Ballots	33
Total vote	799

The term of engagement is for two years, with clause of 60 days notice during the term of the contract. The new doctors are from Medicine Hat and Winnipeg.

Glendenning Death Mystery Remains Unsolved

215 Rifles Collected But No Clue Obtained as to Who Fired Fatal Shot.

Since the death by a bullet penetrating his lungs on May 28, despite searching investigation by Royal Canadian Mounted Police and town police, and the examination of 215 rifles to find which might correspond with the bullet taken from the body, no further clue has been obtained.

Will it be written off police doers as an unsolved mystery? Though every possible avenue which might lead to a clue has been closely followed, the mystery is as baffling as ever.

When Is Enough? Asks Correspondent

Writes of Boys Firing Rifle Without Realizing Danger of Injury or Death to People Nearby.

The following incident occurred on Saturday afternoon at about half past four. I describe it in the first person as being the simpler way. I was walking along the railway at bit more than a mile from Coleman. There were three boys, the eldest of whom could hardly have been more than twelve years old, the others younger. The oldest one carried a .22, and were on the hillside about one hundred yards from the highway. When I came almost opposite them, the one with the gun got down on the ground in quite professional style and aimed at something. I presume a gopher. The bullet may have gone into the ground. A little annoyed, as I was almost directly opposite them, I called for them to

wait until I had passed out of range. However, the boy took aim again and fired. This time the bullet twanged through or hit the telegraph wires almost immediately above my head.

At the first dry crossing I crossed over to where the boys were. They were making off, but stopped when I called. I asked the boy who fired the .22 whether he knew it was wrong to fire across a trail or road. He couldn't understand his shot going high when he was firing so low. The fact that he was on a hillside and firing down toward the road meant nothing to him. He couldn't remember his name, but said he lived in Hillcrest. He was a long way from home. I gave a mild warning and left them.

I relate this incident only to draw attention to the fact that so soon after a most tragic happening in the community, a boy of twelve with two younger boys is allowed to roam the country side with a weapon about which he knows nothing, except how to load and fire it. I think, perhaps, I failed in my duty in not getting the boy's name. But I was not anxious to frighten him.

It would appear that if the authorities can do nothing to prevent children and young boys carrying firearms, parents for their own protection and the sake of their children should themselves put an end to the practice. It is with the hope that this may catch the eye of the parents concerned, whom I imagine do not live in Hillcrest. This incident took place exactly as related. I am anxious not to be known in the matter and this is written only in the public interest. The editor has my name.

MANY THANKS FOR KIND WORDS

Many favorable comments were received on The Journal's eleventh anniversary supplement of last week, which are appreciated by the proprietor and staff. Time did not permit of a more complete coverage of many features of local interest. Preparing material for editions of a special nature requires much more time than does the ordinary "mine run" of news. The encouraging reception given to last week's edition makes us feel it was worth the effort, and the next edition of a similar nature will be prepared well in advance so that it will be more comprehensive. The women's activities will be given their share of prominence, for it must be recognized that they equally, as much as the men, play their part in the progress and achievements of a community.—H.T.H.

Coleman Prize-Winners in First Aid Competitions at Blairmore on Dominion Day

Central School Won First Place in Junior Competitions, No. 2 Team Won Third.

The McGillivray Creek Coal and Coke trophy for senior first aid competition was won by Canmore Collieries, when their competing team received the excellent mark of 1115 points out of a possible 1200. The team from the McGillivray Creek Coal Co., Coleman, won second place with 1042 points and the Greenhill mine of the West Canadian Collieries, of Blairmore, took third place with 1017 points.

In the junior first aid competitions for the Coleman First Aid association's challenge cup, Coleman central school won first and third places with their entries, No. 2 team gaining 728 points and No. 3 team 709 points. Second place was won by a Bellevue boys' team with 714 points.

Winning Teams

Coleman Central school No. 2—John Salus, John Ondrus, Raymon Montalbetti, Jack Graham, captain, and Peter Gandy.

Bellevue boys—John Longworth, captain; Eric Price, Anatol Roshko, Dan Quintillo and Tom Price.

Coleman Central school No. 3—Peter Graham, Nina Berardo, Nick Horbachuk, Bill Graham, captain, and Peter Antonenko.

Other teams competing in the junior first aid competitions were: Coleman Cameron school No. 1 and No. 2 teams, Coleman Central school No. 1 team, Coleman Cameron school No. 1 and No. 2 teams (girls) and First Bellevue Troop Girl Guides teams.

Prizes were presented to the suc-

Highly Honored

M. H. CONGDON

who was highly commended for making arrangements for Mine Rescue and First Aid competitions.

Successful teams at a banquet held in the Greenhill Grill Friday evening. The winning teams were congratulated by the chief inspector of mines, Mr. Millar, W. E. G. Hall and W. G. Healey.

The organization and smooth working out of the various competitions which was carried on without any hitches or delays, with the exception of an hour's delay caused by a down-pour of rain, was highly commended by the officiating judges, who also stated that some considerable credit was due to M. H. Congdon, of Blairmore, who was responsible for and had charge of all arrangements.

Attacks School Course Trends at Board Meet

MILK RIVER, June 27.—The Milk River consolidated school district held their regular meeting at the secretary's office on Monday, disposing of the regular routine of business. A stormy discussion took place on what Trustee Moir called the "canned educational policy of the department of Education." Pupils who had not grasped the three fundamentals of arithmetic, spelling and writing, were being tutored at public expense to become Jacks and Jills of all trades. He

instanced the new typewriting course, which may be proper for cities and large centres, but why should the taxpayers be called upon to shoulder such educational expense? he asked. Parents and guardians have some obligation, and if they wanted their children to have these special courses, should be prepared to accept the financial obligation, and not expect the general taxpayers to assume and pay the full bill, he declared. As the new curriculum is mandatory, the school board is compelled to instal and proceed with the typing course.—The Lethbridge Herald.

BAND CONCERT ENJOYED

Bellevue Band, under Bandmaster Goodwin, gave a fine concert at the lake on Sunday evening. The band will go to Calgary Stampede to play in the procession, and will be garbed in miners' clothes.

Lou Hurlbut, of the Patkinson Hardware, will play with them he being an old professional musician.

CRESTON SCHOOL BUYS REMINGTONS

Alick Harper, manager of Remington Typewriters Ltd., Lethbridge Branch, returned yesterday from a trip to Creston, where he was given an order for 21 noiseless Remington typewriters for the new school to be erected there. The contract for the building was awarded to Poole Construction Co., Calgary, at \$52,000.

Mrs. A. S. Partington, of Creston, is here visiting friends.

Married Men Are Victims

No cause Given to Michel Demeter Till Mine Inspector Makes Report Following Inquest.

Early yesterday afternoon smoke was seen to belch from an airway on the north side of the railroad track at Michel Collieries, indicating that an explosion had occurred. Immediately efforts were made to reach 14 men known to be in that section. Eleven were able to walk out, but Edward Morrison, W. H. Cartwright and Tommy Phillips, all married, were killed, and their bodies brought out later.

Radio news on Tuesday night stated that the mine had been ordered closed by the minister of mines for British Columbia till after the enquiry.

Phillips was about 32 years old, and the other two of middle age. Besides his widow, Cartwright leaves one child. The others had no children.

The mine management declined to make any statement on the explosion.

School Assessment Appeals Are Completed

Board Completes Arduous Task of Adjusting Taxes for School Purposes.

Occupying almost every night for two weeks, the school trustees sitting as a court of revision have completed their work, and as a result the 1938 original assessment, as carried out by Mr. J. W. Chapman, of Edmonton, has been reduced from \$2,222,000, to \$2,184,000, a decrease of \$38,000. (These figures are not exact, only approximate). Some reductions were made, as the figures indicate, but the mill rate of 18 mills as in 1937 will prevail and tax notices are now being prepared for mailing.

Undoubtedly most people will find an increase in taxes, even though valuations may have changed very little on many places, as in former years the levy was made on what was stated to be 60 per cent of the valuation, whereas this year it is on 100 per cent. But the actual dollars and cents to be paid by the individual will be stated to him on his tax notice.

ST. ALBAN'S CHURCH NOTES

Sunday service at 7 p.m. Vestry meeting following the service.

The incumbent will gladly call on the sick and newcomers, when notified.

The church, its public services and work, are supported by voluntary contributions. Every member is urged to use envelopes, and to give regularly and generously to its support. (See I. Corinthians, XVI, 2; and II. Corinthians, IX., 6-15).—Rev. J. R. Hague, Incumbent.

Honest Aid

It was Lincoln, wasn't it, who gave us that epigram about fooling some of the people all of the time and all of the people some of the time? Times have changed. Some people, today, can't be fooled at all. They are the ones who buy thoughtfully and spend wisely. They are guided by the most up-to-the-minute news about products, prices and values. They read the advertisements in their local paper.

Whether you're marketing for today's dinner, for a refrigerator or for a home—the most reliable guides are printed right here in this paper for you. Make it a habit to shop by newspaper, before you set out. It saves time... saves tire some searching... and it saves real money.

Make sure your sales message appears every week in these columns for the guidance of local buyers.

A Livelier Education

While considerable strides have been made in recent years towards the goal of a more attractive educational program for the children in both public and high schools, experimentation shows that further steps can yet be taken before the people and educational authorities of this country can proclaim that the ultimate has been reached.

It is a sine qua non that the more attractive school curricula can be made, the greater the interest that can be secured and, ergo, the greater the interest, the more productive will be the results.

The older generation can well remember the days when history was largely comprised of a long list of dates, tabulated unrelated events and complicated genealogical trees; when a lesson in geography meant commitment to memory the fact that certain cities and towns are located on such and such rivers and are noted for the manufacture of this or that commodity, while nature study, what little there was of it, consisted of poring over books to determine by sheer feat of memory the difference between a sepal and a petal and to differentiate between stamens and pistils; and who that is old enough to have lived in those days can forget the agonies that were undergone to try and remember, let alone understand, that the square on the hypotenuse of a right angled triangle is equal to the sum of the triangles on the other two sides, when taught from a book full of geometrical designs studied with theorems and hypotheses.

Some Steps Forward

As indicated at the outset the science of education has moved forward considerably since those dark days and something has been done to make these and other subjects more alive and interesting and, therefore, more readily comprehensible and more easily assimilated than in the days of the present education.

While that is true no one would have the hardihood to say that the end of the road has been reached and that something more might not be done to remove the rocks from the paths of learning.

The younger children largely live in a land of make-believe of their own devising and to some extent educational authorities have made use of this natural phenomenon to guide and develop their mentality through play acting.

As children develop they become more realistic and here again the wise psychologist takes advantage of the trend to pattern studies on the tableaux vivants order with an eye to practicality, and the pedagogues who adopts this viewpoint will get results where the teacher who merely follows the prescribed routine will find his or her students trailing far behind.

An Interesting Experiment

Giving point to this doctrine, an interesting experiment was carried out in the Regina, Saskatchewan, high schools during the last two weeks in June this summer when a special program for grades nine and ten students, who had been promoted and could not be required to attend classes the last two weeks of the term while their less fortunate colleagues were writing examinations, was put into effect.

This program comprised visits to industrial plants in the city, where processes of manufacture were demonstrated and explained to the students; a visit to the Parliament Buildings where the students conducted a mock parliament with considerable credit to themselves and their teachers; visits to the natural history museum and other institutions where much first hand, concrete information was readily grasped, supplemented by educational films and other attractive media for the assimilation of useful and practical knowledge.

Contrary to expectation the students did not think they had been cheated out of a well-earned extra holiday, but responded eagerly to this special program in the desiring of which they had played a part, demonstrating the truth of the assertion that children are willing and anxious to learn, provided interest can be aroused and sustained.

Should Not Stop

What the ultimate result of the experiment will be, it is difficult to forecast, but in all probability it will lead to the adoption of more of such methods in the day to day curriculum the year round.

What is being done in the larger city schools to stimulate interest can be done in the little red schoolhouses dotted all over the prairies on a smaller scale with revisions to suit local circumstances and conditions. The opportunity is there and it only requires adaptation on the part of the alert teacher with vision, to make education more realistic, more practical and more attractive with attendant greater and more enduring results.

Not Worth The Trouble

Englishman Who Risked Life To See Sultan's Harem Was Disappointed

Among the many distinctions of Lord Mottistone—formerly Sir John Seeley, Secretary for War, Under-Secretary for Air, who is to be that of being probably the only white man who ever saw the harem of Sultan Abdul Hamid and escaped alive. During a visit to Constantinople as a lad of 19 he was being shown round the Sultan's palace under guard of a huge soldier with a drawn scimitar, when he contrived to evade his guide, sped down a corridor, drew aside some curtains, and gained a full view of Abdul's harem. It was very disappointing, he says, for all the women were fat and ugly!—Glasgow Bulletin.

Although neighboring countries appear to have been ignorant of the drink, Abyssinians used coffee as early as the 15th century.

Waterpower is sometimes called white coal.

His Proudest Memory

Engineer For 51 Years Has Never Had An Accident

Billy Gilbertson of Carlisle, England, who drove the famous Royal Scott express train 11,000 miles across Canada and the United States in 1923, has made his last trip—at the throttle of a yard engine. He retired in May on his 65th birthday.

Gilbertson started his railway career on his 14th birthday as an engine cleaner and was paid six shillings (\$1.50) a week. He became a fireman in 1892 and a driver in 1901. During the 34 years he drove he saw express engines doubled in weight.

"When I started on the railway we still had some engines without cabs to protect engineers from the weather," he said. The engines had "only hand brakes to stop them—if you were lucky."

The veteran driver received the British Empire Medal for meritorious service on his return from North America with the Royal Scot.

That he was decorated and drove King George V. in 1932 between Carlisle and Crewe are not Gilbertson's proudest memories. The proudest is his safety record. He has never had an accident.

Savages Provide Idea

Expedition Seeks Head-Shrinking Fluid For Dental Use

A concoction once used by South American savages to shrink and preserve human heads is being sought by a scientific expedition as an aid to modern dentistry.

Dr. Harry B. Wright, explorer, is heading the expedition into Ecuador to obtain samples of the liquid—known as chinche—which he said would be useful in stopping bleeding after a tooth extraction. Dr. Wright, a dentist himself, has made four expeditions into South America and has studied the fluid.

Since the government of Ecuador stopped the Jivaro Indians from taking heads, they use chinche on monkeys and sloths as trophies of the hunt, he said.

"The procedure is the same," the explorer explained. "They remove the skin and boil it in the chinche, which is made from wild vines. The skin shrinks down to about a fourth to an eighth of the original size." C. Winter Wood, secretary of the General Alumni Society of Pennsylvania University, will accompany Dr. Wright.

A Charming Spot

Minakal On The Winnipeg River Noted For Its Wild Beauty

Minakal is an Indian word which may be translated as "The Beautiful Country" and no other description could be so appropriate. About 114 miles east of Winnipeg and close to the boundary of the province of Manitoba, Minakal is a heavily forested country, watered by the Winnipeg river and its network of expansions and tributaries. Its wild beauty and the charm of sparkling streamer river and lakelets combine with climatic qualities to make an ideal Summer playground. Of an altitude of nearly 1,700 feet above the sea level, its atmosphere is dry and invigorating and a tonic to tired and strained nerves. Hay fever is unknown.

Good Radio Reception

Decrease In Sunspots For Next Four Or Five Years

The world may expect a comparatively quiet period for radio reception and other communication during the coming four or five years, Dr. Harlan Setson of the Massachusetts Institute of Technology predicted, for the number of sunspots is decreasing. Addressing the American Association for the Advancement of Science at its summer meeting in Ottawa, the Boston, Mass., astronomer declared the maximum intensity of activity on the sun was apparently reached in July, 1937.

The Smallest Ocean

The Mediterranean is the smallest ocean on the globe yet more famous in history than all others combined. A million square miles of warm, blue and peaceful seas with only one contributory river, the Nile. Sea of the ages, heroes of the Bible, of Greece and of Rome all knew it.

Dorothy—"Mother, what did you do when a boy first kissed you?" Mother—"Never mind."

Dorothy—"That's funny. I did the same thing."

The Great Bear constellation was known as such by both the North American Indians and the ancients of the Old World.

Winnipeg is the greatest transportation centre in Canada, with the largest individually owned railroad yards in the world.

Outlaw Rulers

The Enormous Power Given To Individual Men

The most significant and most disturbing fact in these troubled times is the enormous power of individual men. The future welfare depends upon the will of three men who are despots.

This situation is not a new thing in the world, for kings of old were autocrats whose slightest whim was law; but one must go far back in history to find such rulers who made themselves great.

The kings of modern times were ordinary men, guided by their Ministers. Moreover, they were restrained by certain codes of behavior and unwritten laws, for their first duty was to be gentlemen. And Christian gentlemen are not likely to be a menace to the world.

The new strong men are a different breed. They are not hampered by precedent or ethical standards or codes of morality. They never learned that certain things "simply aren't done" by gentlemen.

For they came up from the bottom, and they recognize no law but force and no rule but their own will. They are as ruthless, as cold-blooded and as conscience-free as any buccanner who sailed the Spanish Main. Men of their kind—strong, daring, domineering—have all throats and looted the earth since history began. They are the Genghis Khans, Tamerlans, Alexanders, Napoleons.—Robert Quillen in "The Fountain Inn Tribune".

SO COMFORTABLE — DIVIDED SKIRTS
By Anne Adams

Sample the ease of movement you get with a divided skirt, and you'll always have one in your wardrobe! As for the making it's easy as A.B.C. with Anne Adams' pattern 4647 giving easy-to-follow directions. A few seams—that's all! And the pleats will fall into place like a charm—even if you are a beginner at dressmaking. Be sure to choose a heavy drif or linen, best of all, a wrinkle-resistant type. You'll feel as sleek as a seal, as correctly and smartly attired as a fashion plate, when you step out for golf, tennis, hiking, or a sail on the lake.

Pattern 4647 is available in waist sizes 25, 26, 28, 30 and 32 and 34. Size 26 takes 2½ yards 36 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Eider Ducks Resourceful

Use Similar Materials For Nest Lining If Down Removed

In addition to providing a new source of revenue for the inhabitants of the north shore of the Gulf of St. Lawrence, the eider-down industry is helping to build up the supply of wild ducks. The eider ducks produce this down on their bodies and place it in their nests as a soft, warm protection for their eggs. It has been discovered that the down can be taken from the nest, by the exercise of due care, without causing the duck to abandon incubation or interfering with the eventual hatching of the eggs. The duck replaces the down in the nest with leaves, straw, moss or similar materials that answer the purpose.

The TIRE BY of 38!
NEW LOW PRICED Firestone STANDARD

Here is the greatest tire news of the year... A new Firestone Standard Tire with everything you need — safety, mileage, dependable, carefree service—all at a remarkably low price. You will want to see the new design of the Firestone Standard Tire and its smart new appearance to fully appreciate all its extra features. Take advantage of this opportunity to save money. Drive in to your nearest Firestone Dealer and have him put these large-sized, rugged, long-wearing Firestone Standards on your car.

Over Niagara Falls

Jean Lussier May Make Another Attempt In A Rubber Ball

Jean Lussier, who rode a rubber ball to fame over Niagara Falls in 1928, is thinking of trying it all over again.

But if he does, he said, it will be with exciting variations.

For one thing, he will go over the rocky American fall instead of the gushing Canadian horseshoe. And his rubber ball this time will be bigger than before, increasing in size like a huge soap bubble as it begins the 165-foot drop.

Lussier, once a salesman in Springfield, Mass., was set adrift in a rubber ball in the Niagara river above the falls at 3:05 p.m., July 4, 1928. The ball was six feet in diameter. At 3:34 p.m. a hushed crowd saw the ball sucked over the brink of the Canadian horseshoe, to reappear a few moments later in the rapids below. At 4:03 p.m. Lussier crawled out of the ball, showing only one small scratch as a souvenir of his experience.

Lussier says he has designed a ball eight feet in diameter. This would roll over the rocks toward the American fall, where the river is shallower. In falling, bags on the side would spread out in a parachute effect.

Canada's First Oil Well

Plaque Unveiled Which Marks Site At Oil Springs, Ontario

The historic site and monuments board of Canada, under the direction of Prof. Fred Landon, of the University of Western Ontario, unveiled July 1 at Oil Springs a memorial plaque to commemorate the first oil well in Canada.

In the earliest history of the locality of Oil Springs travellers observed the presence of oil, which they used for medicinal purposes. In 1858 James M. Williams dug the first well in Canada, later he established a refinery at Hamilton to manufacture illuminating oils. In 1861 John Shaw drilled deeper into the rock and struck the first flowing well, the location of which is on the south bank of Black Creek in Oil Springs. This well and the wells following were the biggest wells ever struck up to the present time in Canada.

Some of them had a flow of from 3,000 to 7,000 barrels per day. Finally these wells played out and the town became almost deserted. Then in 1888 and 1889 men drilled deeper again into the rock and discovered the wells which at the present time are still producing crude oil after 50 years.

Of 70,000,000 acres of land suitable for agricultural development in the province of Alberta, Canada, only 18,000,000 acres are actually cultivated.

One of every two persons living in Copenhagen, the Danish capital, owns a bicycle.

Pacific salmon are the most valuable fish in the western hemisphere.

Air Recruiting Campaign

Royal Air Force Has Asked For 91,630 Volunteers

Launching the greatest recruiting campaign ever undertaken by the Royal Air Force, Sir Kingsley Wood, secretary for air, has asked for 31,650 volunteers. Enrolment of the new flyers and technicians will begin at once.

Sir Kingsley called for 2,100 pilots, 550 observers, 26,000 specialized workers and 3,000 apprentices.

The pilot recruits, who will have officer status, will be paid £340 (\$1,700) the first year and £390 thereafter during a four-year enlistment. Upon entering the reserves for six years they will be paid bonuses running up to £300.

Candidates for these posts must be between the ages of 17 and 25 years and must have a good primary education.

SELECTED RECIPES

THREE-FRUIT ICE CREAM

½ cup sugar
2 oranges, sections free from membrane and diced
2 bananas, mashed
½ cup cut maraschino cherries
1 package Lemon-Jell-O Ice Cream Powder
1 teaspoon salt
1 quart milk

Add sugar to prepared fruit and let stand while ice cream mixture is being made. Combine Jell-O Ice Cream Powder and salt; add milk very gradually, stirring until dissolved. Freeze in freezer until thick but not hard; add fruit and continue freezing. Makes two quarts ice cream.

COFFEE ICE CREAM

1 package Unflavoured Jell-O Ice Cream Powder
1 cup sugar
1 cup water
2 cups strong coffee
1 cup evaporated milk
Combine Jell-O Ice Cream Powder and sugar, add water and coffee very gradually, stirring until dissolved. Then add evaporated milk. Freeze in freezer. Makes about 1½ quarts coffee ice cream.

A Good Story Spoiled

Item About Ink Being Filched From Banks Is Analyzed

Some paragrapher started on its rounds an item saying it cost Canadian banks \$25,000 a year to keep up the ink supplies flicked by persons filling their fountain pens. Most people with workable fountain pens doubt if public ink such as banks or post offices use would tempt them to pilferage that liquid. Beyond this, together \$25,000 would probably buy 75,000 gallons of ink. Of Canada's 10,000,000 people, probably less than 2,000,000 own fountain pens. Of this probably less than 1,000,000 ever fill their way into a bank. Of these, five per cent. would be a generous estimate of those flicking bank ink. Fifty thousand people using 75,000 gallons of ink, figures 1½ gallons of ink per flicker—a lot of black ink these days.—Brandon Sun.

A large collie dog has been observed running wild with a band of coyotes in Colorado.

Says Britain Would Fight Again In Order To Preserve Liberties

Kettering, England.—Making clear that it is the prime duty of his government to avoid a repetition of the Great War in Europe, Prime Minister Chamberlain told 15,000 cheering fellow Conservatives at a party rally Saturday "we would fight again" if there were no other way of preserving "our liberties."

Mr. Chamberlain described the horrors of modern warfare and reminded his audience that 21,000,000 people died in the Great War and 3,000,000 were British, as he declared the government's determination to avert a similar catastrophe.

He spoke also of the barbarities inflicted either willingly or unwittingly in China and Spain, saying: "I wonder whether since the world began, it has ever seen such a spectacle of human madness and folly."

At the same time, the prime minister gave critics a final answer on the question of repeated Spanish insurgent bombings of British merchant ships.

Mr. Chamberlain said explanation of the incidents given by General Franco, insurgent leader, failed to satisfy him. He declared, however, that he was not going to take the chance of involving Great Britain in a war because some British ships took the risk of trading in Spain to make huge profits.

He said Franco's explanation was that his planes flew so high when they dropped bombs on Spanish government ports that they could not possibly deliberately attack British ships in them.

Unless the Spanish war is ended, the prime minister said, Europe will remain on the brink of war.

He said Britain's gigantic rearmament was a sufficient peace anchor for the world, adding it is quite a mistake to suppose that public opinion has no effect even in countries which are governed by dictators.

Concerning Britain's readiness to fight again, the prime minister said: "Well, we fought to preserve this free democracy from foreign domination and dictation and to maintain the rule of law and order rather than the rule of force."

"Certainly we succeeded in preserving our freedom and, if our critics are in danger again and if we are sure there is no other way of preserving them except by war, we would fight again."

Steals From Children

Calgary.—A man entered the Calgary Junior Red Cross hospital and stole the office nurse's waiting for "another man" to bring in a sick child. He was given a chair and a magazine. Twenty minutes later the nurse returned and found a steel cabinet had been pried open and \$25 stolen. The young patients had saved the money from sale of handicraft work.

Ban Election News From East Until Next's Vote Has Been Polled

Ottawa.—Election in western Canada will go to the polls at the next general election in ignorance of the way the election is going in eastern Canada under a provision in the new Election and Franchise Act passed at third reading by the House of Commons.

The new law makes it an offence punishable with a fine not exceeding \$500 or imprisonment for not more than one year or both for any person to publish or broadcast election results from any part of Canada in any province before the close of polls in that province.

The senate gave second reading to the measure, maintaining its historic attitude of not interfering with common elections legislation.

The amendment was the third of three alternative suggestions studied by the special election committee with a view to preventing results in the eastern Canada influencing voters in British Columbia and the prairie provinces because of the variation in time zones. There is a four-hour difference between the Atlantic and Pacific coasts.

Hon. C. G. Power, minister of pensions, who was in charge of the bill, opposed this method first because he considered it impractical and secondly because it would be an infringement of the freedom of the press.

Reckless Driving

Motorist Losing Driver's Permit To Be Banned All Over Canada

Ottawa.—Any motorist who loses his driver's permit as a result of conviction for a traffic offence in one province will be barred from operating a motor car anywhere in Canada under an amendment to the criminal code approved in the House of Commons.

The amendment was one of 50 odd presented to the house some time ago by Hon. Ernest Lapointe, minister of justice, and all passed through committee stage without opposition and with little discussion.

As the proposal was first introduced a person found guilty of driving a car while disqualified by reason of legal suspension or cancellation of his permit in any province would be liable to imprisonment for one month or a fine of \$50 or to both. Mr. Lapointe proposed an increase in the penalty to six months or \$500 and the change was approved.

The new section authorizes a judge to prohibit any persons convicted of certain offences in the code from driving anywhere in Canada for a period of three years and if he drives he becomes liable to the penalty provided for driving while disqualified.

Under the bill reckless driving is made an offence even if no accident occurs and no damage is done.

Cattle Must Be Tested

United States Department Of Agriculture Issues New Order

Ottawa.—Hon. J. G. Gardiner, minister of agriculture, announced that after June 30 all Canadian cattle exported to the United States, other than those for immediate slaughter, must be accompanied by a veterinarian's certificate showing they have been tested within 30 days of the date of shipment and found to be free of bovine tuberculosis and other contagious diseases.

The new order of the United States department of agriculture will be applied to cattle exported from accredited areas in Canada, areas in which incident of bovine tuberculosis has been reduced to one-half of one per cent.

Each effect of the order is to render steers and aged heifers subject to the same certification requirements as other classes of cattle.

Canadian Pilots Chosen

Montreal.—Two Canadian pilots have been chosen for Lincoln Ellsworth's mapping expedition to the Antarctic, the Gazette says. The newspaper says the explorer has selected James H. (Red) Lymburner of Montreal, a member of the 1935 expedition, and Buron J. Trerice, who has been flying recently in Quebec.

Frontier Celebration

Old-Timers Attend Big Gathering At Swift Current

Swift Current.—Many pioneers of southwestern Saskatchewan attended the big Frontier Days celebration and Old-Timers' reunion in Swift Current, Thursday and Friday, over 125 men and women who have lived in the area since before the opening of the 20th century being registered. Old-timers were in high spirits. Old friendships were renewed and many experiences of the old days were recounted.

Friday evening the pioneers were guests of the Swift Current Rotary Club at a banquet gathering. L. B. Thompson was chairman and John Redmond, proprietor of the Maple Creek News, introduced by Hon. J. G. Taggart as one of the early pioneers, was the speaker.

Mr. Redmond said that, as a member of the old North West Mounted Police, he had visited Swift Current in 1880 and again for a short time in 1901, when the present city had a population of less than 100.

The west, he said, changed a man, made him genial because he was so often alone and was pleased to meet even a stranger. Reliability was characteristic of the old-timers, he said, adding that abuse of hospitality or of a confidence was rare among them. They were still the backbone of the west; the aristocracy of the west, and an aristocracy based on accomplishment, he said.

These characteristics were needed in the west now more than in any former day, he continued. The way to keep human values high, Mr. Redmond said, was through a readiness under which the people of the west would be able to stand on their own legs, and he expressed the belief that if public opinion were created for a change of attitude governments would respond.

Long Flight

Two Soviet Flyers Cover 4,300 Miles In Non-Stop Trip

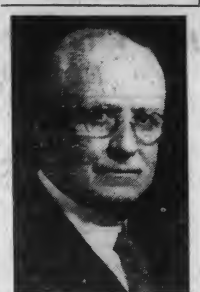

Moscow.—Two Soviet flyers landed at Vladivostok after a 4,300-mile non-stop flight from Moscow to demonstrate the long-range possibilities of the Red army's aircraft. The plane was piloted over sparsely-inhabited Siberia to the far eastern tip of the continent in 24 hours by Major Vladimir Kokkinaki, veteran test pilot, aided by Navigator A. M. Bryandinsky.

Kokkinaki wrote in Pravda, official Red organ, that with the round trip distance between Moscow and Vladivostok, the ease with which Soviet planes could fly over foreign cities in time of war has been demonstrated, as well as the possibility of maintaining contact between Moscow and the far east.

Plane Order For Canada

Ottawa.—An order for fuselages for 200 Tiger Moth training planes for the Royal Air Force in Great Britain has been placed with the Canadian De Havilland Aircraft Company. The Ottawa Citizen said in a news page story. It is believed the order will run around \$300,000, said the Citizen.

NOTED SCIENTIST

Dr. Olin William Caldwell, General Secretary of the American Association for the Advancement of Science, which is holding its 102nd annual meeting at Ottawa this week. Dr. Caldwell is associated with the Boyce Thompson Institute for Plant Research at New York.

Palestine Jew Hanged

British Take Strong Measures To Maintain Order In Holy Land

Jerusalem.—British planes, police and troops patrolled Palestine, thrown into ominous tenseness because of the hanging of a Jew—without precedent during British rule of the Holy Land.

Chanting the song of the Revisionist party and dressed in its uniform, 19-year-old Benjamin Joseph steadily walked to the gallows in the troop-surrounded prison at Acre.

He was the first Jew hanged in Palestine since the Turks hanged a Moroccan Jew at Jerusalem's famed Jaffa gate in 1916. Joseph was condemned to death under the Holy Land's emergency military regulations after being convicted of ambushing an Arab bus last April.

Disorders broke out in several places, although most of them were minor and were suppressed by firm police measures.

Police clashed with crowds after two stormy demonstrations in the all-Jewish city of Tel Aviv. Police fired into the air and then charged the crowd with batons in an effort to disperse it. Two constables, 10 demonstrators and two bystanders were injured.

The trouble spread to Tiberias, where a bomb was thrown in the midst of a Jewish wedding, wounding seven. Subsequently a mob, allegedly Arab, stoned Jews, but timely arrival of police prevented riots.

There were no casualties in the ambush of the bus for which Joseph was convicted, and the Jews asserted the bus was not even struck by gunfire.

Twedeasair On Holiday

Ottawa.—Lord Tweedeasair sailed from Quebec on the Empress of Australia for a month's visit to Great Britain, during which he will be installed a chancellor of the University of Edinburgh, an office to which he was elected some months ago.

Parliament Prorogues At Conclusion Of A Five Months' Session

Japan Lashed By Storm

Earthquake And Floods Take Heavy Toll Of Life

Tokyo.—Japan's worst storm in 60 years, in addition to a heavy earthquake, left a death toll of 100 persons, most of them in Tokyo and Yokohama.

A fraction more than 12 inches of rain fell between dawn and midnight. A cliff behind the Tokyo mansion of Baron Takakami Mitsui crashed down on 12 houses, burying 40 persons, 10 of whom were known to have been killed.

Ten others were killed similarly in Yokohama, and in Kanagawa prefecture 26 deaths were reported. Forty deaths were reported in scattered regions. Police said 150,000 homes in Tokyo alone were inundated with the water level in many reaching to the second floor.

Emergency calls were broadcast, mobilizing thousands of rescue workers from ex-servicemen's societies and other organizations.

During the worst part of the storm an earthquake shook Tokyo, causing collapse of numerous flood-menaced houses and shaking loose more rain-soaked earth from high places.

A railway tunnel collapsed near Kanami, cutting a mainline railroad. Meteorologists warned a typhoon was approaching from the southwest to add to Japan's woes.

Numerous rivers leaped their banks, ripping away railway beds and bridges. Landslides broke the tracks at many points.

Thousands of frail bamboo homes in the lower capital were menaced as Tokyo's maze of interlinking rivers and canals, swollen by two days of rain, threatened to spill over their banks.

It was feared a continuation of the rains, heaviest in 20 years, will threaten this city with a major flood.

B.C. Road Program

\$2,300,000 Involved In Public Works For This Year

Victoria.—Details of British Columbia's \$2,300,000 public works program for the year were announced by Works Minister F. M. MacPherson.

The work includes bituminous paving, highway construction projects, mining roads and trails, ferry replacements, grade separation works, playgrounds and other undertakings.

The federal government will contribute to part of the program, including construction of a new \$600,000 highway from New Westminster to the international boundary.

Approximately 280 miles of road in the province will be hard-surfaced under the program, first announced by Premier Pattullo.

Receive Federal Grant

Edmonton.—The federal government's relief cheque for \$250,000 reached the Alberta government. Hon. Dr. W. W. Cross, minister of health and relief, stated the cheque covered the federal relief grants to Alberta for April and May.

Create Commission For Administration Of Canada's Penal System

Ottawa.—Creation of a three-man commission to replace General D. M. Ormond, superintendent of penitentiaries, in the administration of Canada's penal system, was approved in recent time by the House of Commons after hours of debate on the preliminary resolution. The bill was sent to the senate.

Rt. Hon. Ernest Lapointe, minister of justice, said it was not proposed to make any changes in methods of administration until the new commission had taken office and could lend its assistance.

Establishment of the commission was recommended by the royal commission on penitentiaries which sat under chairmanship of Mr. Justice Joseph Archambault of the Quebec superior court, and was one of numerous recommendations in the voluminous report. It is the only recommendation implemented in the bill.

Replying to a question from Rt. Hon. R. B. Bennett, Conservative leader, the minister said no decision had been reached to act upon the

Ottawa.—Third session of Canada's 18th parliament ended Friday, July 1, after five months of debate and the writing of important new measures into the statute books.

Mr. Justice L. A. Cannon, acting as deputy to the governor-general, prorogued the session formally in the senate chamber at 3:40 p.m., just 15 hours later than the goal set before members of both houses earlier in the week.

The governor-general, Lord Tweedeasair, was on hand for the prorogation ceremony at midnight Thursday night, but when it was found impossible to wind up the business by last time Rt. Hon. Mackenzie King, prime minister, advised him not to postpone his vacation trip to England. He sailed from Quebec Friday afternoon.

In the House of Commons the session ended on a note of goodwill and mutual congratulation as between party leaders. It probably was the last appearance of Rt. Hon. R. B. Bennett as leader of the opposition.

So, led by the prime minister, representative members expressed appreciation of Mr. Bennett's public services, recalling the 11 years he had headed his party in the house, five of them as prime minister.

Taken in conjunction with events half an hour earlier, the incident illustrated the rapidity with which the mood of parliament may change. Just before the exchange of greetings Mr. King and Mr. Bennett matched words in a sharp and angry debate over the reported desire of the British government to disband training schools for the Royal Air Force in Canada.

The final act of the session was the reading of the speech from the throne by the deputy governor-general. It expressed the hope negotiations with the United States would result in a comprehensive trade agreement.

These negotiations, proceeding for the past three months, were mentioned frequently during the session and were the cause of the budget being delayed until June 16. Up until that time it had been hoped the treaty would be completed and ready for ratification before the end of the session.

The speech said an outstanding feature of the session was adoption of a long-range program of development designed to stimulate employment and enlarge the national income.

Mr. Justice Cannon gave royal assent to 32 bills, 19 of them private bills granting divorces.

The others were government measures. They included bills amending the seeds act, 1937, the dairy industry act, the Bank of Canada Act, the special war revenue act, the income war tax act, the criminal code and the farmers' creditors arrangement act.

Other bills authorized financial guarantees to the Canadian National Railways, revision of the Dominion Elections Act, established a board of transport commissioners, amended the radio act and authorized \$20,000,000 for the government's housing scheme.

Create Commission For Administration Of Canada's Penal System

NOTES AND COMMENTS

FORTY YEARS AGO the Crow's
Nest Pass railway was built. Cran-
brook will celebrate the event in Sep-
tember at which old-timers and prom-
inent men from various parts of
Canada will be present.

COMPARING today with forty
years ago impresses one with the
changes that have developed. Air-
planes now travel the sky-ways, both
day and night; distances have been
cut out of hours instead of days in the
time taken to travel; automobiles and
transport trucks have superseded, to a
considerable extent, railway trans-
portation, but—the fundamental prin-
ciples of life remain the same.

THE MOUNTAINS are immovable,
so man flies over them. They are silent
witnesses of the progress of time.
We think we are very modern, yet the
old Roman empire was just as modern
in its way as we are today. The same
political intrigues go on; there is still
the same agitation going on as in
these days to take from those who
have and give to those who have not.
Equal distribution of wealth is still as
strongly talked of, and Democracy is
still the greatest headless monster that
it has been in the past.

THE PROLETARIAT in the days
of the great Roman empire cried
"Smash the Bankers," as certain
demagogues in Alberta are doing to-
day. Tear down and destroy so that
a new social order may be built up is
their cry, all for political aggrandize-
ment on the part of those who pull
the wool over people's eyes and "kid
em" that they are going to bring
about heaven on earth. So the great
game goes on of fooling the people,
that new leaders may succeed the old.

LOOK AROUND this province, and
ask yourself: "Have conditions for
the people been improved since Aug-
ust, 1925, when 12 per cent of Al-
berta's voters stampeded a Social
Credit government into power?" De-
spite being assured at the time it was
going to be so easy to abolish pov-

WEDDINGS

NEWTON - SAPETA

In the presence of a number of
friends, the wedding took place at
Southminster manse on Saturday
evening of Helen Mary Sapeta,
daughter of Mr. and Mrs. Albert Sa-
peta, of Coleman, to Mr. Stuart
Smith Newton, of Coleman. Rev. J.
M. Pritchard officiated. Miss Carry
Sapeta, sister of the bride, and Mr.
William Ferby were the attendants.
Mr. and Mrs. Newton will reside at
Coleman.—Lethbridge Herald.

COUSINS - BROWN

Good wishes of many friends in
Coleman are extended to Mr. and
Mrs. John Roach Cousins on their
marriage last Friday morning in St.
Paul's church. Both have grown up
in Coleman, Mr. Cousins being an em-
ployee of International Coal Co.,
while his bride, formerly Miss Gwen
Brown, was a teacher in the high
school. They are enjoying a honey-
moon trip to coast cities before set-
tling down in their new home in West
Coleman.

The best man at the wedding was
Mr. Jim Cousins, and the bridesmaid
was Miss Dilya Brown. Many attend-
ed the wedding service at which Rev.
H. J. Bevan officiated.

WELCOME GIVEN TO BRIDE OF
CAPTAIN HEWITT

A very warm and sincere welcome
was tendered to Mrs. Captain Hewitt,
of the Salvation Army, on Monday
evening in the S.A. hall, Coleman.

The welcome took the form of a
surprise shower and banquet, when a
large number of friends and acquaint-
ances were present.

Words of welcome to Mrs. Hewitt
were tendered by Mrs. A. Rhodes, of
Bellevue, after which games and con-
tests were sponsored by the young
people of the corps. Later, Mrs.
Hewitt was the recipient of many use-
ful and attractive gifts brought in
by the tiny tots.

A very well provided banquet was
then sat down to, with Mrs. Hewitt
cutting the bridal cake and replying to
the expressions of welcome.

Captain Hewitt then spoke of his
pleasure and interest in returning to
work in the Pass. "There is no place
that the Army could have sent me
to," he said, "that would have afforded
me a better opportunity and more
pleasure than that to be found at
Coleman Corps."

erty in the midst of plenty, conditions
remain the same, and the only bene-
fits that may accrue to the masses
are those bestowed on us by Prov-
idence and our own efforts. It will
always be so, no matter what the
"barkers" tell you.

"WHY DON'T you comment on
lack of seats in the park alongside the
tennis courts?" suggests a reader of
The Journal. Many have likewise
commented, which reminds us that
twelve years ago seats and other con-
veniences were built, and accommoda-
tion of a limited kind for automobile
tourists. Experience shows that the
tourists who made use of it were just
looking for a cheap camping ground,
everything free, so that the discon-
tinuance of it for that purpose is not
regretted, as promiscuous camping
there was unsanitary. But the fact
remains it is a very convenient spot
for townspeople to sit alongside the
gently flowing stream with the rip-
pling music. A bandstand built there
over 30 years ago is in the final
stages of decrepitude. If the local
lodgers were to combine their efforts
in restoring this park to its former
usefulness, they would be doing a
real community service. But will
they? Likely they'll say to them-
selves, "let George do it!"

IT IS VERY QUIET around this
office. Being opposite the schools,
the shouts and laughter of the chil-
dren will be missed during the next
two months. It takes young people
to stir up things, and though at times
their actions may be trying to older
people, yet it would be a sad, quiet
place without them. It gives us the
holiday feeling, too, even though we
are not fortunate enough to take a
couple of months off and use the time
according to our own sweet will. But
even if we can take life a little easier
during the summer months, and get
away for a couple of weeks, there are
many places in the immediate vicinity
where one can spend some pleas-
ant hours, especially if you are fond
of casting a fly on the rippling
stream. We've cast many a fly, but
caught very few fish. That's due to
lack of experience.

Town Council Notes

June 29, all members present at a
regular meeting.

Building permits were granted to
A. Hylk and Bellevue Motors.

Arrangements were made for the
repair of a house on Lot 11, Block C.
A piece of property in West Coleman
was under discussion, and action was
deferred until the council as a whole
views it.

Taxes rebate of 10% will be allow-
ed on town taxes till July 31.

The report on the fire at Hylk's
warehouse and garage was received,
and the fire department was com-
mended for their prompt action.

UNITY COUNCIL EXECUTIVE

Setting up of an executive of five
members from the personnel of the
Provisional Unity Council was recent-
ly announced by John I. McFarland.

Executive members are, Francis P.
Austin, farmer, Ranfurly; Paul A.
Farnals, farmer, Halkirk; S. A. Fox,
merchant, Innisfail; F. S. Gridale,
farmer, Olds; and George G. Ross,
rancher, St. Kilda.

At the first meeting of the provi-
sional council in Edmonton, June 23-
24, the members favored the creating
of a five person executive, and asked
their chairman to make the neces-
sary appointments.

How Does Life Insurance Benefit The Farmer's Wife and Children?

Answer.—If the farmer has Life Insurance, the wife
and children know that they will not be in want in
case of his death.

Question.—How would insurance help?

Answer.—It would provide money for living
expenses, to pay debts, meet mortgage payments,
hire help, avoid sale of the farm at a sacrifice.

Q.—Couldn't this be done through ordinary
savings?

A.—Usually a farmer leaves only a small amount
of cash. Nor can he be sure to live long enough to
save an adequate sum. Only through Life Insurance
can he, with a minimum of saving each year, have
the necessary money available in case of death.

Q.—How do the children benefit?

A.—The father who has Life Insurance is sure that
the children will have the home, care and education
that he intended.

Q.—How does Life Insurance benefit the farmer
himself?

—If he lives to a retiring age, his insurance will
provide a cash income to care for him.

TARIFF BOARD TOLD MON-
TANA OIL PRICES AFFECT
ALBERTA

The price paid the oil producer
in Turner Valley depends upon
what happens in the State of Mon-
tana, according to evidence pre-
sented on behalf of the Alberta
government at a recent sitting of
the Tariff Board.

P. G. Cottle, chief auditor of the
Alberta Board of Public Utilities
Commissioners, testified that he
had recently visited Montana to
study the situation in the oil fields
there. Because Montana had lost
its Canadian Prairie oil market to

the Turner Valley, Mr. Cottle said,
many of the producers have little
or no market at the moment.
Those who have a market will not
agree to share it with their less
fortunate neighbors. Furthermore,
production is exceeding require-
ment and consequently prices are
unstable without prospect of
early improvement. The distress
production is estimated by Mr.
Cottle at 97,000 barrels a month.

"If prevailing prices in Montana
fall much longer," Mr. Cottle said,
"a further drop in prices in Turn-
er Valley can be expected to meet
competition at Saskatchewan and
Manitoba refinery points." [6]

2,800,000 people read the weekly newspapers of Canada. The weekly newspaper is the family newspaper. The leadership of the doctor in "Home Town" communities is the guide to successful advertising.

Mrs. John Salvador and Mrs. G. Chiarovano and daughters Enis and Esther left Sunday for a three months vacation in Italy. They will disembark at Glasgow, Scotland, and spend a week at the Empire Exposition.

Noticed at the Macleod Stampede, a young Indian squaw rolling her own cigarettes as neatly as the whites. Some driving motor cars, wigwags discarded for "pup tents" with stoves inside. Going modern!

Mr. H. Olsen, of Consul, Saskatchewan, is at present visiting his daughters, Mrs. James Kilgannon and Mrs. Leslie Griffiths, here. He states that Saskatchewan people are in much brighter mood than for years over good crop prospects.

Dr. and Mrs. Keith MacLean have as guests this week, Mr. and Mrs. L. MacLean, parents of the doctor, of Innisfail; Mrs. Wilson and son, also of Innisfail, and Mrs. Kerr, of Calgary. The latter is a past president of the Liberal Association of Calgary.

Mr. and Mrs. J. J. Hadley, of Coleman, announce the engagement of their only daughter, Gwyneth Imapy, to Mr. James Jemson, only son of Mr. and Mrs. James Jemson, of Calgary, the wedding to take place the second week of August, at Calgary.

Miss Margaret S. Fraser, sister of Mrs. Frank H. Graham, has been appointed superintendent of nurses at the Royal Alexandra Hospital, Edmonton, succeeding Miss Fanny Munroe, who has been appointed superintendent of nurses at Royal Victoria hospital, Montreal.

James Moores, of Creston, and ex-servant of Coleman, was the guest of Mr. and Mrs. Harry Parkinson and of his brother Sam and Mrs. Moores during the week. Much damage to the wheat lands was done by water breaking through the dykes and as a result there will be no wheat crop this year.

Two local youths came before Fred Antrobus, J.P., on Monday morning charged, with failing to stop their cars at the stop sign. One youth was also charged with driving without a driver's license. Both pleaded guilty and were each fined \$2.00 with \$5.00 costs. Constable Wm. Antel laid the charges.

Additional copies of the anniversary edition of The Journal may still be obtained at this office, 5c per copy, or 10c if mailed from the office to any address in Canada, the United States or Great Britain. Many have purchased copies to send to relatives and friends. The Journal will be pleased to forward copies to any address, in a special wrapper.

Attending the Girl Guides camp at Rock Lake are Mrs. Borden, divisional commissioner, Mrs. A. B. West-John, Mrs. S. B. Ryan and Miss Winifred Dunlop. Isabel McDonald is swimming instructor. About 75 girls from the Pass towns are camping, leaving on Saturday last. Today (Thursday) a presentation is to be made at the camp to Mrs. Borden.

Mrs. Dave Sudworth and Mrs. J. Kostelnik were joint hostesses at the home of the latter on Wednesday evening, June 29, at a miscellaneous shower honoring Mrs. J. Makin (nee Miss K. Marcon). Whist and bingo were enjoyed, whilst prize winners being Mrs. J. Denbyshire and Mrs. V. Collagrosso. Bingo winners were Mrs. Bomben and Mrs. R. Watson. The bride was presented with a well-filled basket of gifts from those present. Out-of-town guests were Mrs. D. McKimben, of Edmonton, Mrs. James Price, of Mountain Park, and Mrs. A. Hackett and Mrs. J. Gillies, of Lethbridge.

NAZARENE MISSION
Rev. C. H. Mooshian, B.A., in charge; G. Berglund assistant and organist.

Tonight, a special service for all interested in the work of the mission. Rev. Lawlor will have charge. His wife will do the special singing.

Friday at 7:30 p.m., we begin a series of bible studies in the book of Genesis. Lesson for this week: read first 25 chapters in Genesis.

Sunday at 11 a.m., Sunday school with classes for all. Evangelistic service at 7:30 p.m., Miss Mooshian will bring a gospel message on "Christ Speaks, Hear ye Him." Next Tuesday at 7:30 p.m., prayer meeting. Everyone cordially invited to these services.

CLASSIFIED ADVERTISEMENTS
WANTED: Second hand washing machine, gas power. Reply Journal.

TYPEWRITING PAPER: 500 sheets bond, 8 1/2 x 11 (letter-head size) for \$125, or single 100 in pad, 30c. Ribbons \$9.00 per dozen for standard machines.—Journal Office.

A Remington Portable typewriter is useful to business men, teachers, to all individuals who write. The Journal can supply them on terms as low as \$5.00 per month.

BUSINESS ANNOUNCEMENTS

The Palm Confectionery breaks into The Journal's advertising columns with an announcement re "Velvet" ice cream. There is also on sale freshly picked fruit direct from the Celli ranch at Creston.

GROCERIES AT ADVERTISED PRICES

Coleman Cash Grocery is offering the best quality groceries at attractive prices in their advertisement in this paper. Always noted for quality, this store has built an enviable reputation for dependability; and has been a consistent advertiser since the paper was first published in 1921.

"MEDO-SWEET" Pasteurized Milk

RECOMMENDED by Medical and Health Authorities as the safest and most healthful form in which milk can be used.

Guaranteed safety from contamination of any kind.

On sale in all Cafes and Restaurants in The Pass towns.

WORLD HAPPENINGS BRIEFLY TOLD

D. H. Marshall of Saskatoon was elected president of the Business Educators' Association of Canada at the annual meeting at Hamilton.

Death of E. V. Lucas, 70, one of the most prolific writers of his generation, was announced recently in London.

Two young masked men held up a Canadian National Railways office in the Toronto Union station and escaped with \$400 after forcing two employees to open the office safe.

Bertrand H. Snell, Republican leader of the house of representatives and hard-hitting critic of the Roosevelt administration, announced his retirement from the United States congress.

Arthur Henderson, Labor, announced his intention of asking Prime Minister Chamberlain for closer consultations to be instituted between the British and Dominion governments on foreign affairs.

President Roosevelt's decision against construction by the United States at this time of battleships larger than 35,000 tons suggests confirmation still is lacking that Japan is building super-warcraft.

Rabbi Samuel Sachs of the University Avenue Synagogue in downtown Toronto told police that the synagogue was broken into and damage caused to holy scrolls, bibles and prayer books. Nothing was stolen.

Six guns, some blankets, a hundred "jews harp", paint and a congregation of other articles bought the present state of Delaware from the Indians for English settlers in 1675, a paper discovered by the Enoch Pratt library showed.

A Paying Occupation

New York Beggars Collect About Fifty Thousand Dollars Daily

Money begging pay? Enthusiastically it does, states James Finin, in the Forum. The professional beggar "take", in authenticated cases, has reached \$50 a day.

A 22-year-old beggar, arrested for scratching the arm of a restaurant hostess when she refused to let him solicit from table to table, was found to own a home in Riverside, Rhode Island, and a \$6,800 bank balance. He claimed that the income from begging in the Eastern seaboard cities had dropped, during the recession, from \$65 to \$12 or even \$10 per day.

Fifty thousand dollars per day is the estimated haul by beggars in New York City alone. Most of this is picked up by individuals, operating on their own. But signs of syndicated management appear.

A man in the Bronx, arrested recently, turned out to be a pan-handling overlord. Each morning he delivered his beggars to "work" in his car. He called for them at night and collected their money; then he lodged and fed them and paid them with cheap liquor to keep up their morale.

For Quick Results

Holland Gardeners Germinate All Their Seeds Before Planting

Interesting custom of the enterprising Dutch gardeners might be followed by gardeners elsewhere who wish to speed germination of seeds.

According to a plant breeder who came to this country from the Netherlands, the Hollanders place seeds in a cloth bag and hang the bag in a nearby canal overnight. The bag is taken out and hung for 48 hours in the cow barn, where it is warm. By this time the seed has sprouted and it is broadcast by hand in the garden plot.

Gardeners need not, of course, hunt up a canal or build a cow barn, but they may hang the seeds overnight in any water-filled container, then place the bag in a warmer place for two days and nights. This practice is especially recommended for beets, carrots and spinach seed.

Showed His Gratitude

A hitch-hiker, about 70 years of age, handed Mrs. Barney Carey and her daughter Ruth each a \$1,000 cheque after he had eaten a free meal at their service station lunchroom near Warsaw, Indiana. The cheques were signed "John S. Smith" and were drawn on a New York bank.

The most advantageous way to drink milk is to sip it. When gulped, it's likely to curd and make it more difficult for the digestive juices to tackle.

Belgium has tightened its censorship of motion pictures.

Luther Burbank developed white blackberries.

Defending Democracy

Preserving That Delicate Compromise Which We Call Civilization

(From an address given at Yale University by Lord Tweedsmuir, Governor-General of Canada, upon receipt by him of an Honorary Degree.)

"I am not going to repeat the ordinary platitudes about how close and nearly related the Americas are and what good friends they ought to be. I believe profoundly in their friendship, but don't let's be too self-conscious about it. Don't let's be always pulling up the plants to see how the roots are getting on."

"In my view the best way for Britons and Americans to understand each other is not by analyzing their emotions but by doing things together. Especially I recommend what I have been doing this last week-end, going fishing together."

"It would like to say one thing to you to-day and to say it with the force of a confession of faith. You will hear people repeat here and across the Atlantic that our young men are not up to their fathers' standards, that they haven't the old enterprise, the old pioneering spirit, the old keenness about adventure. I believe that to be wholly untrue. I believe that our youth was never better, at least the youth I know in Britain, in Canada and in the United States."

"It is a platitude to say that we live in a difficult world. As I see it, the world to-day is a contest between the spirit of adventure and kindness, as represented by my distinguished fellow-graduate, Walter Disney, and these dismal people in Europe who preach and enforce what they call ideologies."

"But, gentlemen, it is also a very exciting world. A Yale graduate who goes into an ordinary business or profession has to take part in preserving that delicate compromise which we call civilization, in the face of many destructive forces. He has to show that the patient methods of democracy are more efficient than any authoritarian regime."

"Democracy which a few years ago was a platitude is now a cause, a crusade, an adventure. And if the Yale graduate gives his life to the pursuit of some kind of knowledge, he is not only doing good of great public value, but he is giving himself to a life of perpetual adventure. He never knows what small side track of his researches may end in an epoch-making discovery."

"Yes, gentlemen, I think we can tell our young men that they have got a more difficult task before them than their fathers, that they are called to a harder test and a graver responsibility, but they have wider horizons to travel to and a greater opportunity to prove the virtue that is in them."

To Gather Information

National Museum of Canada Field Parties are Active

Six parties have been placed in the field this year by the National Museum of Canada. The program as announced by the Mines and Geology Branch, Department of Mines and Resources, Ottawa, includes biological and botanical investigations in British Columbia, Alberta, Manitoba, and Ontario, and archaeological studies in Ontario. The work is being directed toward the gathering of new information on Canadian fauna, flora, and native races, and the acquiring of new specimens for the National Museum.

R. M. Anderson, chief of the Division of Biology, is studying mammals in the Waterton Lakes district of Alberta.

H. M. Laing is continuing a biological survey of the coast of British Columbia, with particular reference this year to the area in the vicinity of Bella Coola.

Angus Shortt is continuing a study of bird life in Manitoba which is being carried out from Churchill southward to the International boundary. Work this year will be chiefly in the vicinity of Dauphin.

R. C. Hoise is continuing with his botanical studies of the region north of Lake Superior.

W. J. Wintenburg will make excavations in the vicinity of Wauwassee, on what may prove to be the site of an old fort of great historic interest.

The two main agricultural products in Babylonia were barley and dates, but farmers also raised onions, garlic, peas, beets and greens.

There are about 2,500 species of snakes in the world, and 300 of them are poisonous.

The present strength of the Royal Canadian air force totals 167 officers and 1,489 men in other ranks.

British inventors have patented a silver plating that does not have to be polished.

NEW FROCK AND BOLERO TWSOME

By Anne Adams

1859

The very spirit of summer—in this new little frock with its own bolero! Mothers can make it up swiftly in a few short mornings—and they won't stop at one outfit either, because Pattern 4839 is just as appropriate for a Back-to-School outfit as it is for summer wear.

The bolero may match or contrast, and top other outfits too, and how the children will adore it, since it's cut just like a grown-up's style. The sprightly dress will make the kiddies forget the heat. Look how the cap sleeves are cut in one with the bodice to simplify stitching—how few are the seams in that love of a high-waisted skirt—how little trimming is needed. Step-by-step sewing instructions included.

Pattern 4839 is available in children's size 2, 4, 6, 8 and 10. Sizes 6, dress and pantie takes 2 yards 36 inch fabric, and 1 1/2 yards ruffling; bolero, 1/2 yards 36 inch fabric. Send twenty cents (20c) in coins (stamps cannot be accepted) to the Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to: Anne Adams Pattern Dept., Winnipeg, Ave. E., Winnipeg.

For Interest In Arts

Albert Medal For 1938 Has Been Given To Queen Mary

The council of the Royal Society of Arts has awarded the Albert Medal for 1938 to Queen Mary in recognition of Her Majesty's unrelenting interest in arts and manufactures to the great benefit of industry and commerce.

Examples of Queen Mary's interest in art are the prominent part which she played in connection with the British Industries Fair and the careful attention she gives year by year to the individual exhibits at the fair.

The Albert Medal has also been awarded to Queen Victoria, King Edward VII, King George V, the Duke of Windsor and the Duke of Connaught.

Fashion Note For Men

Violet is the "masculine color of vigor and strength" and men should wear more of it, Karl S. Bolander, director of the Columbia, O., Art Centre, asserted. Clad in a purple shirt, violet tie and brown suit, Bolander addressed a Buffalo advertising club and said: "Violet is my favorite color and it should be the favorite of every man. Violet gives a man confidence and power."

SHIPWRECKED SAILOR: "Me mother always said I was born to be 'ung. I 'opes as how she's right."

The Red Cross And Resuscitation

Specialized Knowledge Regarding Proper Methods To Be Followed

An integral part of Red Cross Home Nursing Course, the Schaefer Method of Resuscitation from drowning, gas poisoning and electric shock, has been demonstrated by the Red Cross to approximately 50,000 Canadian women and to thousands of High School students.

The Red Cross Home Nursing Course was initiated in 1924 to meet an insistent demand from women in all walks of life for specialized knowledge regarding the fundamentals of nursing science and the proper procedures to be followed in meeting emergencies.

Drowning being one of the major emergencies which might face any family, the Red Cross designed its Home Nursing Course so as to stress the importance of resuscitation and to familiarize every student with the Schaefer Method. This method is first demonstrated by a doctor or graduate nurse and, under their guidance, the students are then given actual practice in the method of procedure.

In addition, the Red Cross Home Nursing Manual, which is now in the emergency libraries of thousands of students, contains pictures and explicit instructions to be followed in case of drowning.

Many letters have been received from past students of the Red Cross, expressing gratitude for this knowledge and, in a number of cases, describing how they had already used it in the saving of life.

A Chaotic World

Lord Tweedsmuir Sees Civilization In Grave Peril

Lord Tweedsmuir, governor-general of Canada, declaring that modern-day life in a "distressed and chaotic world," with civilization in "grave peril," commended to a Harvard University audience an attitude of "conservative, Christian anarchism."

Recipient of an honorary degree at Harvard's 27th commencement, he addressed the annual meeting of the Harvard Annual Association.

"Conservative," he added, "means that we want to preserve what is still vital in our heritage from the past. Anarchist means that we are resolute to clear away rubbish, whether new or old."

"We need a deepened respect for human nature. It is our business to fight whatever for the sake of a narrow theory, would crush and enslave human nature."

Humor was "the best weapon with which to fight pedantry and vain glory and false rhetoric."

In a time like the present, "when the ties of religion have been sadly relaxed, there is a tendency for popular leaders to exalt themselves into a kind of bogus deity and to think their shallow creeds a divine revelation."

"The answer to all that sort of folly is laughter."

Account For Many Claims

United States Insurance Companies Pay Billions For Bathub Accidents

Bathbubs are the cause of so many accidents that since 1929 insurance companies have paid more money in claims resulting from such accidents than the government has spent on relief. These accidents have cost insurance companies nearly \$20,000,000,000 in death claims and loans, Charles Adams, of Columbus, Ohio, told delegates to the National Accident and Health Association's convention in Cleveland.

The Dead Sea of Palestine contains no living creature, since it is too salty for life. Its chemical contents have been estimated to be worth more than \$1,200,000,000,000.

SUNDAY SCHOOL LESSON

JULY 10

CALEB: LIFE-TIME DEVOTION

Golden text: Let us go up at once, and possess it; for we are well able to overcome it. Numbers 13:30. Lesson: Numbers 13:26-35; Joshua 14:6-15. Devotional reading: Psalm 121.

Explanations And Comments

The Division of Canaan, Joshua 14:1-5. The division of the land of Canaan among the tribes of Israel was made by lot, which was carried out by Eleazar, Joshua, and one representative from each of the tribes.

Caleb's Special Claim, Joshua 14:6-15. At Gilgal Caleb reminded Joshua that when the twelve men were sent from Kadesh-barnea to spy out the land of Canaan, only he and Joshua had brought back a good report and urged the going in immediately to possess it. To that record of courage he added that he had wholly followed Jehovah. Read Numbers 13:17-33.

The other ten spies had discouraged the people, Caleb added; they had "caused the heart of the people to melt," had made them too covenanted for the task before them. Moses had promised him that day that he and his children after him should have a special allotment of land because of his loyalty. All this had happened 45 years before this, and Caleb was now 85 years of age. He and Joshua were the only ones still living of all the host who had left Egypt.

"Caleb's faith in the Lord was of itself invigorating and life-giving. It tended to longevity. The promise to Caleb that he should enter into the Promised Land while the scouts who doubted could not be allowed to pass over Jordan was not an arbitrary promise. The man who can go scouting into the Promised Land and come back with a favorable report while his companions are in despair is the man who will come out 45 years of hardship stronger than he went in. The Lord has fraught his bodies with a certain kind of spiritual nutriment, which feeds even the bodies of men. This is the strength enforced and re-enforced through chapters of Israel's history. It was the enforcement of this lesson which led to the writing of the books. The Israelites were in the days of the conquest fed from within. They did the will of the Lord and their faith in him kept them strong" (Francis J. McConnell).

Joshua gave Caleb an official blessing of the tribe of Judah, and allotted him Hebron and its surrounding district.

Lack Of Restraint

Young People Of To-day Unwilling To Submit To Older Conventions

D. G. McCullough of the department of social science at Toronto University, declared at Vancouver that young people of to-day are unwilling to submit to the older conventions.

Speaking before the sixth Canadian conference on social work. Mr. McCullough quoted the words of Peter the Hermit in the eleventh century:

"Young people of to-day think of nothing but themselves. They have no reverence for their parents or old age. They are impatient of all restraint. What passes for wisdom with us is foolishness with them."

This, the speaker said, showed that adult attitude toward youth had changed little over the centuries.

"Many sociologists tend to believe that family is an outmoded institution, of which the increasing restlessness and revolt against conventional marriage are only symptoms," he said.

"They hold that mankind has passed through two stages, the clan and the family, and is now entering the third—the individual."

The most obvious evidence of family disorganization, Mr. McCullough said, was found in the increase of divorces.

Veteran Mountie Dead

Alan Forrester Joined Force Shortly After Riel Rebellion

Alan Forrester, who crossed the prairies ahead of steel as a member of the Royal Northwest Mounted Police, died at Nelson, B.C., aged 72. A Great War veteran and one of the earliest members of the British Columbia police, he joined the Mounties in Regina shortly after the Riel rebellion, for which he enlisted but saw no active service. During his 10 years in the force he rose to be its youngest sergeant.

Forrester joined the customs service and British Columbia police at Rossland, B.C., in 1895, and went to Nelson 10 years later.

He was a native of Glasgow, Scotland, and went to Bruce County, Ontario, with his parents in 1872. He was educated at Royal Military College, Kingston, Ont.

Government scientists in Egypt have been doing research for two years for the purpose of raising standards of bee wax.

A sheep or deer stamps its forefeet when confronted by a dog, as did its ancestors in early times when beset by wolves.

Health LEAGUE OF CANADA presents **TOPICS OF VITAL INTEREST** by **DR. J. W. S. McCULLOUGH**

Editorial Note: Readers desiring the complete set of Dr. McCullough's career articles at once may secure same by writing to The Health League of Canada, 105 Bond St., Toronto, Ont.

Inevitably Allies

United States Will Be Found In Defence Of Principles Of Democracy

The average American may not define in words the loyalties he shares with certain other people. But in the democracies of Europe—in the little democracies in the danger zones; in the more fortunate democracies of Scandinavia; above all, in the great democracies of France and Britain—the average American finds a way of life which he knows instinctively to be the way of life which he himself has chosen.

He knows that these democracies are the outposts of our own kind of civilization. The democratic system, of the progress we have achieved through the methods of self-government and of the progress we still hope to make tomorrow. He knows that if these outposts are overrun by dictators of either Right or Left we shall find ourselves deprived of friends. He knows that, despite geographical remoteness and a traditional desire to avoid entanglement in other peoples' quarrels, we are inevitably the natural allies of the democracies of Europe.

It is important that the statesmen of aggressor countries should realize that to-day, no less than in 1917, there are specific and vital American interests in all parts of the world which would almost certainly be affected by war on a large scale. It is important that they should realize the real depth of American loyalty to the whole set of principles and methods and traditions which goes by the name of democracy.

No remoteness from the scene of a potential European conflict can isolate the United States from the consequences of a major world war.

It is important that the American people from favoring their natural allies. In any ultimate test of strength between democracy and dictatorship, the good-will and the moral support—and in the long run more likely than not the physical power of the United States—will be found on the side of those nations defending a way of life which is our own way of life and the only way of life which Americans believe to be worth living.—New York Times.

Made Dream Come True

Lame Man Has Lawn Mower Operated By Remote Control

A lawn mower that operates by remote control while the operator rests in the shade of a tree is the result of a device of Alvin Lodge, of Millersville, Pennsylvania, has made come true.

The remote control was a necessity with Lodge. Too lame to do his grass cutting in the ordinary way, Lodge installed two motors on the usual type lawn mower from which the handle had been removed. Three wires run from the machine to a chair in the shade, thus enabling the operator to apply power to either wheel and make the turns.

A paint can fastened to the mower acts as a spool around which the wire winds and unwinds to prevent tangling. Ordinary house current operates the motors.

Has Paying Business

Weekly, during the fishing season, a progressive business man of Boothbay Harbor, Maine, ships 6,000 pounds of blood and sand worms to the New York area to supply the city's anglers with bait. A week's supply consists of about 20,000,000 worms from six to 24 inches long.

"But for Edison we wouldn't have had the motion picture, the talking machine, or the telephone."

"Yes, but I still think he was a great man."

It will surprise many people to learn that out of every three tickets sold on the Irish Sweepstakes in America two are counterfeit.

Daily use of
Wrigley's
Spearmint
Chewing Gum
is fine for
teeth

Dentists recommend Wrigley's Gum as an aid to strong, healthy teeth, cleanses them of food particles, massages the gums, aids digestion, relieves stuffy feeling after meals. *Helps keep you healthy!* Take some home for the children too—they will love it! **5-3**

WHAT HO!

—By—
RICHARD CONNELL
By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER XIV.—Continued

"Good-by, Ernest," he said, "and may the gods who watch over the good bless you now and always."
"Good-by, sir," said Ernest, humbly. "And thank you for everything."
Rosa gave him her hand. He squeezed it so hard she gave a little cry of pain. Then, without another word, he turned and ran out of the castle, and jumped into the waiting car.

Ernest did not open the earl's farewell gift till he was in the train and on his way to London.

The package contained the earl's treasured collection of autographed photographs of motion picture actors and actresses.

Ernest began to laugh. Then, suddenly, he began to cry.

CHAPTER XV.

There were no sounds of revelry by day in Bingley Castle as the wacky car, containing Ernest, clattered away making sounds like a fat tap-dancer on a tin roof.

"Rosa!"

"Yes, father?"

"You're blubbering again."

"Yes, father."

"Don't."

"Can't help it."

"Halls no place for it," said the earl. "Too draughty. Let's both go to my study and have a good cry."

"I'll stop," said Rosa. "What's the use, I think I'll go riding with Eime after all."

"And I," said the earl, "shall go and do things to the zinnias."

He started out of the door, then stopped, turned and shouted,

"Rosa!"

"Father? What's wrong?"

"I did meet that girl," said the earl.

"What girl?"

"Ernest's girl."

"You couldn't have."

"I did though."

"Ernest said she has never been in England."

"Master Ernest is a blooming liar."

The earl caught his daughter's hand, and said,

"Come with papa. I'll show you."

They half-ran to the library. From a case the earl took an old album, rifled through its pages, and stopped at one.

"Who is that, pray?" he exclaimed, triumphantly.

Rosa bent over, his shoulder and looked at the old picture and the inscription.

"Lucy Bingley," she said.

"Knew that girl of Ernest's had a Bingley nose," said the earl.

"But she's been dead a century and more," said Rosa. "He can't be engaged to her."

"It would be unconventional," said the earl.

"Why should Ernest lie to me like that?"

"Ask him."

"He must be hiding something."

"Who isn't? I mean, well, all have our little secrets."

"I must know why he lied to me."

"Too late to catch him now, my dear."

"Father?"

"What?"

"Have you any money on you?"

"I've a half crown in a pocket somewhere."

"Is that all?"

"Yes. But Crump has sixteen pounds. He won it on a horse race."

ITCH

... STOPPED IN A MINUTE ...

Are you tormented with the itching trouble of eczema, furfur, athlete's foot, ringworm or other skin afflictions? For quick and happy relief, use COOLING, ANTISEPTIC, ITCHING and D. D. Prescription. Its gentle oils soothe the irritated skin. Clear granules and disinfectant clear. Stops the most itching itchiness. A 3c trial bottle, at drug stores proves it—or money back.

I saw it."
"Get it."
"What for?"
"Never mind. Get it."
"Anything to oblige a lady," said the earl. "Where are you going?"
"To change my clothes."
"No. I'm going to London."
"Right you are. We can just catch a train from Bristol if we step on the gas."
"We?"
"You and I."
"But why you?"
"Young lady," said the earl, "you're not the only Bingley that has a heart. Get a wiggle on."

As their train wormed its way into the heart of the metropolis, the Earl of Bingley and his daughter were finishing their session as a ways and means committee of two.

"Oh, you'll find him, never fear," the earl assured Rosa.

"But where? He left no address."

"Oh, rich Americans are always easy to find in London," said the earl.

"In the morning one looks in the Bond street shops, or in the Burlington Arcade, where they gather in droves to buy regimental stripe ties. At noon they are to be found in the Cheshire Cheese or Simpson's-in-the-Strand, lurking behind steak-and-kidney pies. Afterwards they are in the better West End bars. By evening they have flocked to the costlier night-clubs, and when these close they go to ground in the swankier hotels."

"I'll try the big hotels first," said Rosa.

"And I," said the earl, "shall follow his spoor from bar to bar along Piccadilly."

"I don't think you'll find Ernest in a bar. A book store is more likely."

"One never knows where one may find a will-o'-the-wisp like Ernest."

"He is unexpected," admitted Rosa.

"Though why he concocted that elaborate fairy-story about a fiancee, I can't imagine."

"Rovena Castle" chuckled the earl. "And that touch about her father owning all the pubs in Chicago?"

"Do you think he really has delusions, father?"

"Not that cucumber," replied the earl, emphatically. "We had many a pea-pow in the potting shed on everything from wild peace to sweet peas, and I must say I found old Ernest sound and rational—"

"But why invent a girl?"

"Oh, he must have a reason, and a jolly good one, too. Romeo does not leave Juliet in tears for a laugh."

"Where do you get that Romeo and Juliet stuff?" demanded Lady Rosa.

The language of the younger generation, said the earl, primly, "is as shocking as their attitude toward us old guffers of sixty. You talk as if we had neither eyes nor memories."

"What have you noticed?"

"E. Bingley is smitten with R. Bingley; but R. Bingley considers E. Bingley a weevil, a quince, a twirl and a poor thing."

"That's not so," flashed Rosa. "I love Ernest and you know it."

"Of course I know it, dear," said the earl. "I've known it since I saw you playing house in the tree-tops."

"Do you mind?"

"I do," said the earl.

"Why? Because you think the gossip will say, I married him—I mean I would have given him money?"

"That's a lot of turtle-soup," said the earl. "It's just as easy to love sincerely a rich man, as a poor one. But we Bingleys don't marry for money. Wish one of us had—"

"Why do you object to Ernest?"

"You need not glare at your venerable dad like that, Rosa. I don't object to Ernest as Ernest. I just happen to think that no man that ever had knees and elbows is worthy of my darling daughter."

Rosa smiled.

"Would you give us your blessing?"

"Ernest is oaky-dosky by me," said the earl.

"You're a dear old dear," cried Rosa, and kissed him.

"Thank you," said the earl, "but I must point out that before one can make 'hassencfeffer' one must bag the bunny."

"I'm not trying to bag Ernest, and he's not a bunny," retorted Rosa, laughingly. "I just know it since I saw what I think of him for telling me such an outrageous lie."

"Oh, I see," said the earl. "Well, here we are. Paddington. And what a beastly day it is. Suppose you start and show with Papa Ivanhoe. I'll give the bars a try. Then you phone me at my club at seven. I'll be there, dressing for dinner."

"Are you taking me to dinner, father?"

"Sorry. I must do dine and do a show with Papa Ivanhoe. I'll Rublagna together, and so on."

"When do you meet him?"

"Seven-thirty sharp. At his club. Arranged it yesterday."

WHEN USING WILSON'S FLY PADS
READ DIRECTIONS CAREFULLY AND FOLLOW THEM EXACT

Each pad will kill flies all day and every day for three weeks.
3 pads in each packet.
10 CENTS PER PACKET
At Druggists, Grocers, General Stores.

WHY PAY MORE?
THE WILSON FLY PAD CO., Hamilton, Ont.

"He may be late."

"Not Pucky. Always on the dot."

"He may be just a little late," said Rosa.

"I read in The Times this morning that he is in India."

"Well, well," said the earl. "He must have flown out last night. How these cabinet ministers do get about!"

"Pity to waste your theatre seats," said Rosa. "What are you going to see?"

"Pantomime at the Haymarket."

"I love pantomimes," Rosa said. "Maybe if I had a mink coat you'd take me."

He caught up his umbrella.

"I'll take you across my knee, you imp," he cried.

They both laughed.

A minute later they debouched from the train.

"Good hunting, dear child," said the earl as they parted in Piccadilly Circus.

But it was not good hunting.

When she phoned to her father at his club at seven she said, wearily,

"He's not at any of the better hotels."

"He's not in any of the better bars," reported the earl.

"I put advertisements in the personal columns of all the newspapers," said Rosa.

"So did I," said the earl.

"What are we to do?"

"Keep looking," said the earl. "And don't worry. If he's in London we'll find him."

"He must be here," said Rosa. "No ship sails to New York for three days."

"Check with me tomorrow morning at nine," the earl said. "Now I must chop off our chat. I've got to crawl under the bed and look for my shirt-studs."

"So Pucky Ivanhoe did get back from India, after all," said Rosa.

"Suppose you get back home to the zoo," said her father and hung up.

Lady Rosa almost did go to the zoo. She had tried nearly every other place in an American millionaire might be. She decided to dine at Nero's, instead.

To dine at Nero's was an extravagance, Rosa knew, if her purse made you strike the right hand side of the menu; but there would be soft music there to rest her, and good food to give her strength; and she knew that the fact that Nero's was the most expensive restaurant in the world gave it an irresistible lure for visiting Americans of means.

Admits It Was Hard

But Treatment Restored Youth According To Venerable Hindu Sage.

Do you want to prolong your life? Then you might try the treatment of 77-year-old Pandit Madan Mohan Malaviya, vice-chancellor of the famous university at Benares, India, and one of the holiest and most revered men in India, has completed. It consists simply of a regime of living in the dark, drinking water, buffalo's milk and partaking of certain herbs with a little honey and butter.

Pandit Malaviya declares 40 days of this rejuvenation treatment improved his weight by nine pounds, improved his eyesight, darkened his hair, restored his old voice, improved his complexion, enabled him to walk erect, and restored his memory.

"It is a hard ordeal," said the venerable Hindu sage. "I did not see the world for 40 days. I was all alone in a cottage, and lived most of the day and night in the pitch dark. Bath, exercise and massage were forbidden, nor was I permitted to have a shave. Throughout the period of my treatment I was allowed to drink not water. My diet consisted of black cow's milk."

The pandit disclosed his doctor was Rajat Bala, reputed to be 172 years old, a herb practitioner, and said to possess the rare "secret of youth."

Speaking of the problem of places to go for the summer vacation, there is always the last resort: home.

We have lots of books but no shelves. No one seems to lend shelves.

Police Patrol For Bridge Opening

Links Canada With United States Over St. Lawrence River

A colorful police patrol has been ordered at the boundary between the United States and Canada for the official opening of the New Thousand Islands International Bridge between Clayton, N.Y., and Ivy Lea, Ontario, near Brockville, on August 18th. Canadian mounted police co-operate with New York state troopers in regulating the tens of thousands of automobiles and the more than a hundred thousand persons expected to attend the dedication of this new connecting link between the two countries.

Royal Mounted Policemen, in red coats and sombreros, and New York State Police in their grey will join in policing both sides of the St. Lawrence River at Clayton for the three-day celebration. A special corps of marine police is planned to regulate river traffic during the three days, particularly on August 20 when marine parade will provide spectators with the greatest assemblage of pleasure craft ever exhibited on the St. Lawrence.

Arrangements are being made by New York State Police and the Royal Mounted for privileges to cross the border in handling the anticipated crowds. The actual dedication of the bridge, at which President Roosevelt has tentatively accepted an invitation to attend, will be held on Wellesley Island, one of the largest in the Thousand Islands group.

The new bridge, which in five separate spans and 8½ miles of approaches and roadways links Canada with the United States over the St. Lawrence river and the Thousand Islands, crosses almost the exact spot in the river where the latest hostilities between the two nations occurred a century ago during the Patriot War.

The incident was the plundering and burning of the Canadian-owned steamer Sir Robert Peel by a band of 22 men disguised as Indians. The leader of the raid was William Johnson, a former Canadian soldier who married an American. As a result of Johnson's act, both governments placed steamers in the St. Lawrence for protection of the border.

But the patrol boats remained in the river only a few months. Late in 1812, further agitation was disclosed in public meetings and newspapers and sentiment began to develop to promote peace and harmony of the frontier. Dedication of the bridge on August 18th will mark one of the greatest acts of accord between the two nations.

Skin Test

Scientists Say It Changes In Elasticity During Disease

Ability of the human skin to stretch is a newly discovered prognosticator of death or recovery in several serious diseases. The methods of using skin stretch, worked out at Tulane University School of Medicine, were reported to the American Medical Association by the Tulane physicians have worked out methods of measuring both skin stretch and tissue pressure and of using them to foretell the course of illness before the patient himself feels a change.

In disease the skin tightens the tissue, pressure rises. In health the abdomen skin has the greatest elasticity, six times as much as that of the shin bone, and twice as much as the skin on the back of the hand. Why, the physicians said, is not known.

The pressure in the tissues of the back of the hand is equal to a column of water half an inch deep. From this low it ranges up to 1½ inches of water for leg tissues. But in some diseases these tissue pressures are multiplied up to 10 or 15 fold.

Figures recently published in England show that more than 500,000 people are disabled or injured on London streets in the last 10 years, private cars being responsible for about one-third of the accidents.

The new Oxford Dictionary sanctions the use of "Am't I?" But Dr. F. C. Professor William Lyon Phelps never got to first base trying to popularize "Am't I?" as a contraction for "Am I not?"

A three-minute telephone conversation between any points in Great Britain can be made at night for 45 cents.

Canada produced 355,121,000 pounds of butter during 1936.

Names Almost Unknown

Few Of Younger Generation Ever Heard Of Pioneer Ocean Flyers

Nineteen years ago—on June 14, 1919—Lieutenant Arthur Whitten Brown and Captain John Alcock, D.R.C., took off from Newfoundland in the first attempt to fly across the Atlantic. Their machine was an ordinary double-engine Vickers-Vimy bomber. Sixteen hours later (a record that held for ten years) they landed in Ireland. It is recalled that when they emerged from the machine Brown's only comment to his partner was: "How's that for a fancy bit of navigating?"

These men flew "blind" through fog which enveloped them after they left Newfoundland. Their machine was coated with frozen sleet, and the speed indicator jammed. Their wireless failed and they had nothing to depend upon but their instinct, their courage, and their engines.

For a time they lost all sense of direction and even horizontal sense. Once when the fog lifted they found, to their horror, that the machine was rushing downward in a mad spiral. With the waves only a few feet from them, they zoomed upwards so steeply that they had to loop to escape the retribution of the sea. They never sighted a ship and the weather was so foul that only four readings were they able to take readings.

At last the white-tipped rollers of the Galway coast told them that they were nearing journey's end. So they landed, having done what no man had ever done before. They were welcomed with frenzy, knighted by the Government—and then forgotten. Sir John Alcock was killed a year later.

Next year the 20th anniversary of this pioneer flight will occur, and a Newfoundland exchange suggests marking the occasion in some suitable manner. A tribute to these courageous Englishmen who blazed the trail for Lindbergh and others is indeed long overdue.

It is a sad commentary on our insular difference to a great Empire achievement that even the names of these men are unknown to many of the younger generation, to whom later and less important exploits in aviation are familiar history.

In The Farmer's Yard

An Appreciation Of The Value Of Improved Surroundings

It is a mistake to think that the farmer does not appreciate the true value, both monetary and as to his outlook on life, of having attractive home surroundings and neat, tidy farm barns and lands.

SPORT NOTES

GOLF FOOTBALL BASEBALL TENNIS

Balloch Wins East Kootenay Tennis Championship

A large number of tennis enthusiasts watched, with interest, a hard-fought tennis match on Sunday afternoon, in which Bill Balloch defeated the defending champion, Chick Roughhead, in four sets 6-7, 10-8, 6-3, 6-3, for the singles championship of the East Kootenay. Roughhead showed surprising form and came from behind in the first set to overcome a two game lead and win the set. He again led in the second, but failed to win points at the critical time as Balloch started to force the play and won out 10-8. Balloch dominated play in the third and fourth, winning fairly easy. The Hon. H. H. Stevens trophy was awarded the winner for one year.

Edmonton Grads Lose

At Lethbridge

Percy Page's world famous Edmonton Commercial Grads played at Lethbridge on Dominion Day against a boys' All Star team known as Lethbridge Collegiate Institute. The appearance of the Grads in Southern Alberta gave a large number of fans an opportunity to see them in action. The Grads are a small team, only two members, Noel McDonald, only Jean Williamson, being tall. What the boys lack in height is amply made up in skill and pep. The girls had the All Stars going in circles during the first two minutes as they maneuvered through the All Star defence with ease. The Grads play a combination game, each player always being in position, seldom do they play any individual play. On the other hand the All Stars' game was for every point as the boys shook off their stage fright and settled down to win the game. Never at any time far in the lead, the Grads had to work for every point as the boys shook off their stage fright and settled down to win the game. The Grads' game was the gain worn on and the score kept fairly even, the boys sensed victory and used their weight and speed to advantage to ake out victory by one point 30-22.

At free throws the Grads are almost dead. The boys almost out-shot Grads 2 to 1 in their attempts at field goals to earn their 30 points.
